

Want multiple lines?
Want to color groups of points?

ggplot needs one variable (column)
with group labels
NOT
separate columns

```
ggplot(casey, aes(x=year, y=n, color=sex)) +  
  geom_line()
```

```
> casey  
# A tibble: 132 x 5  
   year sex   name     n  
   <dbl> <chr> <chr> <int>  
1  1950 Female Casey    16  
2  1950 Male   Casey   117  
3  1951 Female Casey    18  
4  1951 Male   Casey   154  
5  1952 Female Casey    28  
6  1952 Male   Casey   180  
7  1953 Female Casey    31  
8  1953 Male   Casey   179  
9  1954 Female Casey    34  
10 1954 Male   Casey   236  
# ... with 122 more rows
```
